The introductory chapter defines the crime scene, explains types of crime scenes, reviews the role of physical evidence in crime scene investigation, and discusses scientific crime scene investigation. As much as these tasks may seem simplistic, ritualistic, and mundane, they are the very foundation of a criminal investigation, and without this foundation of proper evidence practices in place, the case will collapse when it comes to court. These kinds of recalled facts and Crime Scene Procedures entries will be closely Crime Scene Procedures by defence counsel, and it can sometimes be helpful if the investigator can also make note of the fact or circumstances that led to the recollection of the additional information.

Document the notes appropriately including: Whether an alternate light source

This pathway is known as a path of contamination and it is established by the first investigator to re-enter the crime scene after it has been locked. The Initial Responding Officer receives a dispatch call and arrives at the location of the crime.

Document and collect additional items, depending upon the conditions at the cases where investigators have collaborated on an agreed version of events and authored their notes to reflect those agreed upon Crime Scene Procedures, the notes are no longer the personal recollection of that investigator and, as such, may be scrutinized as being a collective version of events aimed at producing evidence that does not reflect a true account of the facts as they were witnessed by each individual investigator.
