The concept of technological and organizational change basically concerns the ability to execute various strategic initiatives. Network policies and governance comprise formal rules and regulations as well as informal aspects such as culture and identity. However, still many owners, executives and managers of SMEs are rather reluctant to fully benefit from networking and quickly refer to barriers such as lack of time, low awareness of value and benefit of networking or fear of disclosing or diluting competitive advantages.

Thebusinessmodelreceivesthisinformation,connectsittothestrategyar
The traditional vector space model assumes term independence and terms serve as the orthogonal basis vectors of the vector space. Competencies are different in each enterprise and represent a high-level view of components according to the type of business value provided.
