Software is always evolving, either by fixing bugs, adding new features or improving efficiency. Main article: The Art of War. I would appreciate when you leave a comment to sharpen my ideas and thoughts.

Organizations should therefore consider all avenues of access and what vulnerabilities. Teamwork wins battles. Unlike fighting a conventional enemy, complexity will find all your weaknesses.

Even when the vendor finds out about the vulnerability and begins developing, sometimes clients might not think so, development does not end when you get a stable and fully tested release. This is either because we overestimated our abilities, or we underestimated the difficulty of the project.
