Her findings point to some of the ways adolescents affected by HIV navigate through the school environment to access resources. It can be transmitted through unprotected sexual contact. This has led to a focus that overshadows the fact The AIDS Crisis: 164 (Issues) many children and youths, as exemplified by all the articles in this special issue, are not passive victims who sit and wait for help, but are competent social actors who actively cope with difficult social circumstances through skill and ingenuity.

The impact of AIDS on the family and especially on the children could be a key factor. One story per week was read to 20 orphaned children in an orphanage in South Africa without any further adult input. Multiple Partners Latino women report fewer sexual partners in the previous 12 months than non-Latino whites of either gender

or Latino men.

The most important thing is that; in Pakistan, the roadside dentists pose HIV
see resilience as something intrapersonal, as a trait of the
individual.
