This is hardly a formal poll, but it is also far from a subtle point: over a few years, readership and research had moved from paid subscription or library copy hardbacks onto the Internet, and away from large established institutions to smaller organizations, some with notably less dependence on the people about whom they reported. These reports took on every characteristic of deliberate falsehood, since extensive inspections had conclusively demonstrated that these did not exist, and because this matter was very much part of the public record outside of the Times.

Can you trust the numbers? An independent source of news and views from the academi  
The first part of the strategy was to shift responsibility for litter and waste from companies to consumers. Any visits by Manafort would have been logged.

According to Conway, her contributions to the project were also supplemented by  
Images. Plastic is everywhere not because it was always better than the natural materials it replaced, but because it was lighter and cheaper – so much cheaper, in fact, that it was easier to justify throwing away.
